## Statement on Recent Events at Flint High School

---

As a city councilman, I am deeply concerned about the recent incidents of violence at Flint High School. This behavior is not just a reflection of our youth but also highlights the systemic issues our schools face, including underfunding and understaffing.

To address this, we need innovative and collaborative solutions such as :

1. **Increased Funding:** Advocate for state and federal resources to enhance school safety, support mental health programs, and improve staff-to-student ratios.
2. **Community Engagement:** Establish partnerships with local organizations to provide mentorship programs and after-school activities that engage students positively.
3. **Conflict Resolution Programs:** Implement training for students and staff in conflict resolution and emotional intelligence, fostering a culture of understanding and respect.

**Together**, we can create a safer, more supportive environment for our children and ensure that our schools are places of learning and growth.

Thank you.
